

Firefox

about:config settings I need

image.animation_mode once	Play animated images only once
media.autoplay.blocking_policy 2	Try to block autoplay
privacy.firstparty.isolate true	Isolate 1st party cookies to prevent tracking over multiple domains
privacy.resistFingerprinting true	More resistant to fingerprinting
geo.enabled false	If sites request geo-location FF uses google's location service and sends IP, nearby wifi access point and random client ID
media.navigator.enabled false	Disallow sites to track status of mic and cam status
network.dns.disablePrefetch true	Because of Privacy Implications
network.prefetch-next false	Performance in page loading to the cost of privacy
dom.event.clipboardevents.enabled false	Disables sites getting notified when you copy to clipboard

Ressources for the table above

- <https://kb.mozillazine.org>

Addons

- [Disable YouTube Number Keyboard Shortcuts](#): Disables youtube's access keys to seek current video position with *Alt+NUM*
- [LocalCDN](#): An alternative to DecentralEyes. Serves fonts, javascripts like jquery which would be loaded from third-parties otherwise
- [WhatCampaign](#): Addresses containing Google Analytics parameters will be altered to protect your privacy: no buttons to press and no configuration required.
- [Stylus](#): CSS plugin write custom CSS and load sheets form userstyles.org
- [Tabby](#): Save and restore open tabs - rarely needed, but good to have
- [Tridactyl](#): Very powerful and feature rich vim-addon - highly recommended for vim users
- [uBlock origin](#): The well known ad-blocking addon
